VEGETATIVE SOLUTION

APPLICATIONS

ROOFS

PLAZA-DECKS

## DESCRIPTION

SOPRANATURE SEDUM MATS are composed of a variation of sedum species pre-grown in a growing media supported by a non-woven polyester matrix. The sedum species can be adapted to hardiness zone and local climate conditions. SOPRANATURE SEDUM MATS are a pre-vegetated solution for extensive roofs, roof-gardens and plaza-decks SOPRANATURE.

## INSTALLATION

Unroll SOPRANATURE SEDUM MATS directly over SOPRAFLOR growing medium. Water to saturation immediately after installation and consult maintenance guidelines for continued care.

During the first year, the SOPRANATURE SEDUM MATS must be tied-up together at a rate of one tie-wrap per side, in order to counter wind uplift prior to the proper growth of the root system.

FOR COMPLETE INFORMATION ON PRODUCT INSTALLATION AND RECOMMENDATIONS BASED ON HARDINESS ZONE AND CLIMATE CONDITIONS, PLEASE CONSULT YOUR SOPREMA REPRESENTATIVE.
